

Technology

Â

Technology provides the momentum behind Ryobiâ€™s products.Â As a leading supplier of large, complicated castings, we offer a full-range of technical support to our internal and external customers. Ryobiâ€™s R&D Team is skilled in all aspects of the die casting process. Their main focus is application technology. In addition, we concentrate on die gating and solidification design, as well as process and part quality improvement.

Â

The R&D Group works closely with Universities and Professional organizations such as

Ohio

State

University

and the North American Die Casting Association.Â Through our relationships with a number of universities Ryobi offers internship programs for individuals interested in working in the high pressure die casting industry. We also provide in-house technical training to advance the technical skills of our employees.
